TITLE : ICE CREAM

ABSTRACT : PROBLEM TO BE SOLVED: To obtain the subject new product free from the hardening problem of the covering food material even by freezing and having a form different from conventional ice cream by covering an ice cream with a food material consisting of a sponge cake composed mainly of whole egg, granulated sugar, liquid sugar, emulsified oil and fat, soft wheat flour, BP and a liquid oil.

SOLUTION: An ice cream is wrapped with a food material consisting of a sponge cake composed mainly of whole egg, granulated sugar, liquid sugar, emulsified oil and fat, soft wheat flour, BP and a liquid oil. Concretely, the objective product having an appearance like a Paozu (a Chinese meat bun) can be produced e.g. by steaming the sponge cake material in a mold with a hot steam to prepare an outer food material, putting the outer material 3 in a hemispherical plastic vessel 2 having sporadically formed recesses 6, filling ice cream 1 in the mold, covering the cream with a bottom food material 4 consisting of the above sponge cake and pasting the bottom sheet 5.
